Gro

Mia Cullin

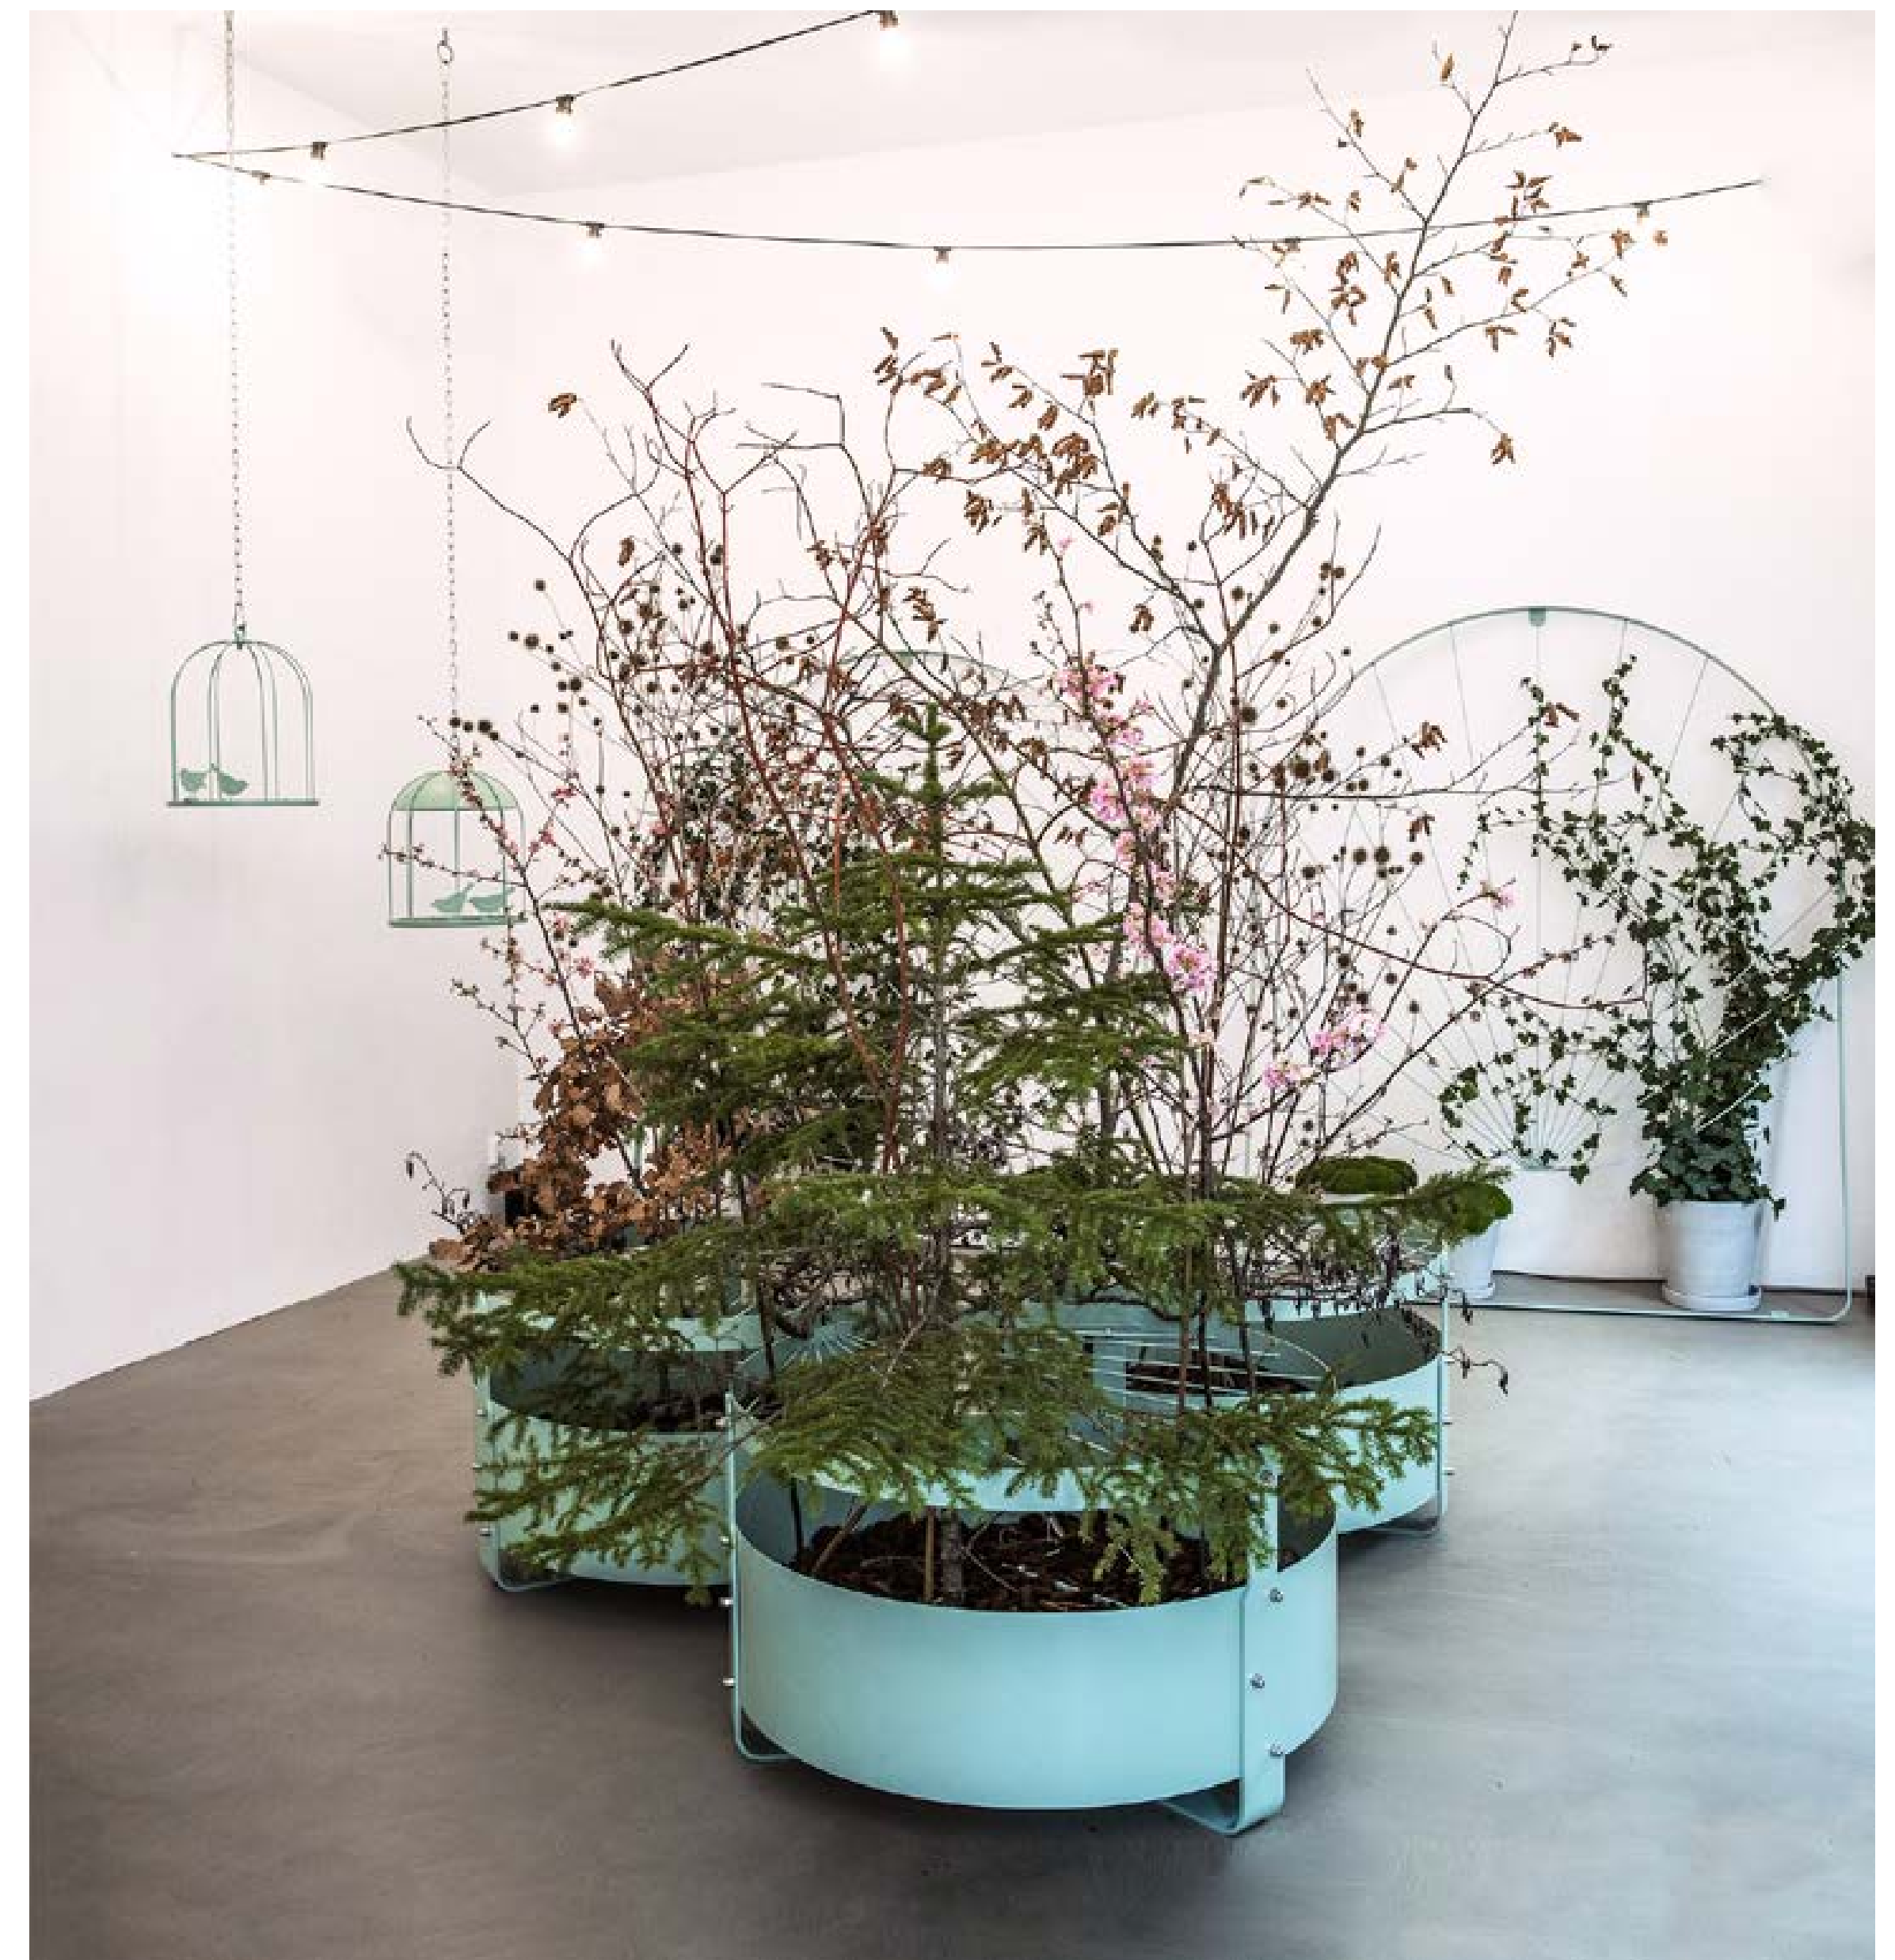

Gro is a series of planters that celebrates the beauty of nature, making it possible to bring climbing plants, vines and creepers into any environments. The mobile planter is fitted with frameworks designed in a geometrical triangle. When several planters are placed in a row, their decorative geometrical designs can create an attractive screen or provide a stylish means of dividing space.

Rollers integrated into the base make Gro easy to move; despite its substantial size, the planter can glide from one space to another. The stationary round planter has an integrated grid supporting the plants.

Lotus

Anna Kraitz

Lotus is a solid, generous planter made in sandcast 100% recyclable aluminium. The planter's sculptural design captures the beauty of the petals' rounded shapes as it creates a container for flowers, plants and ornamental trees.

Clustering several planters together creates an attractive feature, and placing them in a row can provide a stylish means of dividing space. The planter's unique style suits variety of outdoor settings.

[READ MORE ABOUT LOTUS →](#)

Cacti

Anki Gneib

These indoor planters can refresh everyday environments with vivid colours and vibrant plants. Cacti are made with metal trellises that mimic the shapes and proportions of cacti.

The planters bring nature indoors, adding decorative features or dividing the space as they dampen noise and improve air quality. The planters are available in three different sizes with trellises made in three different heights.

Cacti planter is for indoor use, and makes
a nice additiuon to any office or lobby where
you want to use plants as room dividers.*

Pots

Broberg & Ridderstråle

This striking set of freestanding containers towers above conventional plant stands. Pots is made in two versions, providing a duo of two containers or triptych of three, both supported by slender legs.

The containers are powder-coated in green, beige or blue. Pots can be positioned to complement seating arrangements or to divide space.

Folke

Karna Lindstedt

The Folke group of planters is free of embellishment or decorative detailing, characterised by sleek surfaces that emphasise the robust beauty of cast aluminium.

The planters are made from 100% recycled sand-cast aluminium. Available in four sizes, Folke provides the perfect container for virtually any type of plant life. Integral inner containers and internal irrigation tanks for watering are also available.

environmentally responsible choice that
also ages in a beautiful way.*

Hinken

Thomas Bernstrand

The smooth contours and gleaming surfaces of this sleek design make the Hinken planter a perfect complement to contemporary spaces.

The planter's efficient plastic-fibre and steel design are free of embellishments or decorative details, making it discreet enough for modern museums, galleries and other design-conscious places. Hinken is also available as a litterbin.

Arabesque

Anna von Schewen

This stylish planter is actually a robust design made to complement contemporary architecture and landscaped gardens. The surface is characterised by angled geometric shapes that resemble the intricate profiles found in ornamental tile works.

The planter's substantial size is big enough to grow shrubs and small trees, making it possible to bring plant life to areas covered in concrete. Made from sand-cast aluminium, the planter is lightweight and easy to place.

Daisy

Mia Lagerman

The daisy's popularity has led to its widespread use in urban areas, and now its rounded petals can be seen in planter design. The planter's bottom edge is sculpted in contours that recreate the outlines of daisy petals, creating a border of curving shapes. Made for use indoors and outside, the planter is fitted with adjustable feet to compensate for uneven surfaces.

ABC

Broberg & Ridderstråle

The ABC set of planters provides a versatile system for outdoor terraces. The units can function as individual planters, combine with each other to divide space, or create a decorative feature. Whether placed individually or grouped to form a cluster, the planters add a sculptural element to any environment. The ABC planters are for use indoors and outside, and are well-suited to any space where minimalist design places a central role.

Berzelii

Ulf Nordfjell

This smooth, basin-like planter can be placed atop a corresponding concrete pillar to double its height, or positioned on a textured surface to create a striking contrast. The planter is fitted with an inner container and an irrigation tank to keep the compost moist.

Berzelii can easily be adapted to use as a fountain or water feature.

Frame

Broberg & Ridderstråle

This set of planters is characterised by sides that taper inwards and upwards from the base, meeting the upper rim at an inner point, making the upper part of the frame visible while concealing the lower half. By making the frame visible, it creates a wide rim and provides handles.

Stensjökrukan

Monika Gora

This freestanding planter is made in three sizes. The largest is big enough to contain a flowerbed with trees, shrubs and ornamental features. The planters are made for outdoors use, making it possible to bring plant life to paved surfaces such as outdoor courtyards, park areas and terraces.

into many different kinds of environments.*

Sake

Gunilla Hedlund

This modular planter is crafted from components that combine together to create a striking silhouette. The parts attach to each other, enabling the planter to be built up to different heights. The components can be stacked to create a scale from light to dark. Sake's versatility maximizes its functionality, and its distinctive shape has a strong resonance with styles from the Far East.

Play with variety by adding to the
planters height or by using several units
in different shades of grey.*

Egypt

Jan Ostwald

The pyramids and desert sands of ancient Egypt provided the inspiration for this urban planter, created by turning a pyramid-shaped form upside-down. The planter can hold water as easily as it can contain earth, making it a versatile feature for any terrace or garden. Made from COR-TEN steel, the ashtray's surface oxidises over time to create a beautifully weathered patina.

The planter can be fitted with an inner container and irrigation tank to keep the compost moist.

Cube

Nola Studio

The Cube planter is an efficient concrete design made to complement contemporary architecture. The planter's substantial size is large enough to contain trees, making it possible to restore plant life to urban areas covered in concrete. The planter may be used to create pedestrian barriers or restrict vehicle access. Cube can enhance a building's appearance by making space for plant life in an urban setting.

Solaris

Almén Gest Design

This multi-faceted planter is a striking geometric form that uses light and shadow to highlight its angled surfaces. Crafted in powder-coated sheet steel, the planter is lightweight and strong, and provides a striking complement to architectural settings. Solaris' sleek shape provides a potent contrast to organic shapes.
